PROFILE

Junior DOP and adaptable creative technologist bridging the gap between cinematic storytelling and on-set innovation. As a continuous, self-directed learner, I actively seek out and master new systems to solve complex production challenges. Whether I am building specialized hardware for camera departments or designing custom AI agents to streamline creative workflows, I thrive in environments that require both a deep technical foundation and a refined eye for visual composition.

EDUCATION

2021 Baccalauréat Général

Lycée Charles Poncet, Cluses (FR)

2022 – present Master in Film & Television

LUCA School of Arts, Genk (BE)

WORK EXPERIENCE

2024 – present **Co-founder & Product Developer – ChargeLink**

– Building a dedicated radio frequency battery monitoring solution for camera assistants on film sets.

– Participating in the VRT Seeds & Growth programme & KBC start it.

– Responsibilities: System architecture, Software engineer and UI design, user testing with ACs, pitching to industry partners. (Play Media, De Mensen, Studio 100, VRT), Market & Patenting research, Public relations.

2023 – 2024 **Founder & Content Creator – Coenenvideo**

– Started Coenenvideo for fun during a quieter school period, making stop-motion style car videos and experimental automotive edits.

– Grew the account to millions of views, which led to collaborations and freelance work for automotive brands. Creating a trending and new way to capture a new audience. Grossing as a hobby 15K in revenue in less than a year.

– Developing a strong eye for motion, composition and dynamic, music-driven editing tailored to social media formats.

2023 – present **Camera Assistant (NEP Belgium & DB Video)**

– Assisting camera and vision teams on multicamera and live productions.

– Helping with camera setup, lenses, cabling and on-set troubleshooting.

– Gaining hands-on experience with broadcast workflows and professional camera systems.

Summer 2025 **EIC Intern – NEP Switzerland (UEFA Women's Euro, Switzerland)**

– Shadowing the Engineer in Charge on live sports broadcasts.

– Observing the full technical chain from cameras to control room and on-air output.

2023 – 2025 **Freelance Video Editor & Camera Operator – Automotive & Race Events**

– Editing promotional and social media videos for automotive brands (incl. Audi & Aston Martin).

– Shooting race events and track days (incl. Ford Mustang events) with a focus on speed, motion and atmosphere.

– Combining handheld, gimbal and long lens work to capture both vehicles and crowd.

– Delivering dynamic, music-driven cuts tailored to online platforms and brand guidelines.

2023 – present **Freelance Translation – Various clients**

(incl. Prime Video, The North Face, Fortnum & Mason, Philips)

LANGUAGE

- Dutch - native
- French - native
- English - fluent
- German - basics

SKILLS

Filmmaking

- Cinematography / camera operation
- Visual storytelling / shot design
- Editing: Adobe Premiere Pro

Technical

- Embedded programming: C / C++
- Raspberry Pi, ESP-32 (Linux, shell, services, remote debugging)
- GUI design with LVGL for touchscreens
- Basic web: HTML
- prototyping and hardware testing

AI

- Creating AI agents, personalized workflows (Claude, Gemini, Openclaw)
- AI Creative (Seedance, Topaz Studio)

Production & Organisation

- Budgeting and basic production management
- Negotiating with suppliers
- Profesional mindset
- Coordinating teams
